FFG is agitating for war

Ireland is not sovereign. Our sell-out leaders are tied by a thousand threads to the sinister cathedral of Brussels, made up of unelected corrupt EU bureaucrats, military hawks and Thatcherite technocrats.

The military complex takes respite at Shannon before raining down death on lands afar, our airport used by the U.S as a military outpost to facilitate the transport of war equipment to the NATO and Israeli occupational war machine. At the same time, in the fields of the 6 counties, occupation by a foreign power sowed the seeds of imperialism long ago, and with its 7,000-strong colonial military police in the RUC/PSNI partitions the land to this day.

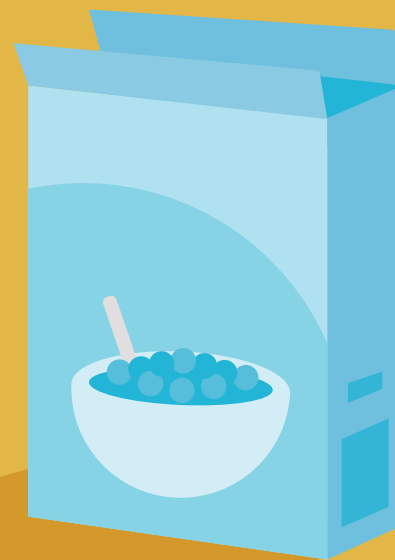

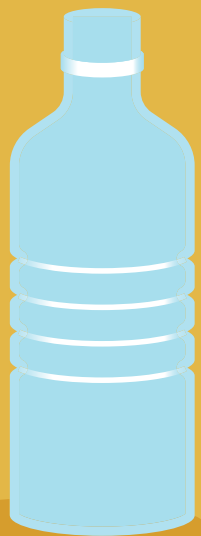

FFG do whatever its imperialist masters of Brussels, Washington and Westminster tell it to do. A subservient relationship is set up in which Fine Gael and Fianna Fáil praise these foreign capitalists, shake their hands and give them shamrocks, bow to their every wishes; too docile, too meek, and too cowardly to stand up for our proud nation.

90% of data centers are in working class areas

A report from an independent think-tank has found that nearly 90% of Dublin's data centres are located in economically deprived communities.

In 2024 data centres accounted for 22% of Ireland's total grid electricity, and in the period of 2017-2023 the increased energy consumption due to data centres entirely eclipsed renewable energy production from wind added to the grid.

The International Energy Agency predicted that by this year (2026) a third of Ireland's grid electricity would be used by data centres with blackouts being predicted.

Tasc found that 84 of the 97 Dublin area data centres are located in disadvantaged areas.

Do what you can: The FFG government will prioritize big corporations.

Be prepared for
skyrocketing fuel prices as
Shannon Airport continues
to be used as a warport for
US imperialism.

Shannon Airport Warbase

The United States, with more than 800 military bases in 70 countries and its aggressive interventionist foreign policy, has been the single biggest driver of Western imperialism for decades, toppling democratically-elected governments it does not see aligned with its political agenda and plundering countries for natural resources.

Shannon Airport, in Ireland, is part of the bloody U.S war machine. Shannon Airport has been used by the US military for almost two decades now.

Approximately three million US troops and their weapons, regular US Air Force/ Navy cargo planes, and an unknown number of CIA extraordinary rendition flights passed through since 2002.

Note: Ireland is not sovereign.

Landlordism in Ireland

Landlordism in Ireland is a result not of natural market laws, something inevitable, but it is a conscious policy by those in power. Due to decades of neoliberal social and economic policy perpetrated by this government on the people of Ireland, housing has become both scarce and expensive. Bad living conditions, landlords running amok and setting high rents, an entire system based on the extraction of wealth results in what Engels called social murder, where members of the working class meet premature, unnatural deaths.

Homelessness is a result of FFG policy

Homelessness and precarious living situations have become commonplace in Ireland. Recently, the Health Research Board reported that 124 people died while sleeping rough in 2022. The FF/FG government does not represent the will of Ireland - they have sold off the country to foreign capitalist interests, the EU, Brussels and America.

European leaders are selling your data to Israel

The European Commission has been secretly negotiating an agreement with Israel's police service that would allow the wholesale transfer of sensitive personal data from EU systems to Israeli authorities, covering biometric information, genetic data, location tracking, political opinions, and more.

The agreement would operate through Europol, the EU's policing agency, and the data could be accessed by Israel's National Police and internal security service, Shin Bet. It is a massive expansion of a 2018 arrangement that explicitly excluded personal data sharing and explicitly excluded the occupied Palestinian territories. This version includes both.
